ERP & SAP Interview Preparation Guide

ERP

ERP (Enterprise Resource Planning) integrates departments like Sales, Finance, Inventory, HR, Purchasing and Production into one system with a centralized database.

Benefits

Centralized data, automation, real-time reporting, reduced duplication, improved productivity and decision making.

Core Modules

FI(Finance), MM(Material Management), SD(Sales & Distribution), PP(Production Planning), HCM(HR), QM(Quality), PM(Plant Maintenance), ABAP(programming), BASIS(administration).

Business Processes

Order-to-Cash: Quotation→Sales Order→Delivery→Invoice→Payment. Procure-to-Pay: Purchase Requisition→Purchase Order→Goods Receipt→Invoice→Payment.

Master vs Transaction Data

Master: Customer, Vendor, Material, Employee. Transaction: Sales Order, Purchase Order, Invoice, Payment.

SAP Basics

SAP stands for Systems, Applications and Products in Data Processing. It is the world's leading ERP platform.

Architecture

Presentation Layer → Application Layer → Database Layer.

Important Terms

Company Code, Plant, Storage Location, Business Partner, Material Master, Vendor Master, Customer Master, Cost Center, Profit Center, PO, SO, GR, GI.

AI Invoice Project

Image upload → OCR → JSON extraction → Validation/Normalization → Database → ERP integration for Accounts Payable automation.

AWS EC2

Know EC2, SSH, Linux, Security Groups, IAM, Elastic IP, Nginx/Apache, deployment, MySQL connectivity.

Interview Questions

What is ERP? Why SAP? ERP modules? Master vs Transaction data? Order-to-Cash? Procure-to-Pay? Explain your AI invoice project and AWS deployment.
